Personal Details

Date of Birth: 09-09-1997

Projects

CHATSKOOT-APP   (MERN PROJECT)

- A real-time Chat Application built using **MERN** which allows the user to share their thoughts securely with their loved ones.
- A real-time chat function is provided by **Socket.io** it provides a platform for users to communicate with each other in real-time.
- Used **Cloudinary** website to save user's images on the cloud.
- For getting authentication-token I used **json-web-token** package. it defines a compact and self-contained way to securely transmitted information between parties as a JSON object.
- the application based on **Synchronous** and **Asynchronous** communication, user can engage in real-time conversation or leave message for letter replies.
- Used **Chakra.UI** framework which provides users with an intuitive and responsive design.

CLOUD-BOOK   (MERN PROJECT)

- A fully functional website built using **MERN** with an authentication function where user can create their note on the cloud.
- Implemented features like **login** & **Signup** page for storing user credentials, So that any user can access only his own notes.

OpenAI Stark-A Smart Coder   (OpenAI-API Project)

- A fully functional AI website built using **ViteJS**, **Express** & **NodeJS.**
- Used **OpenAI-API** to receive Bot's response to the user's questions.
- It allow user to simply write their requirements of code they want and the Bot will write the actual code with logic.
